

BEACH LOUNGE COLLECTION

5 YEAR WARRANTY

The Beach Lounge is the result of a collaboration between Alexander Rose and UK based designer, Carsten Astheimer.

The unique difference of this collection is the ultra-comfortable, water proof cushions and the way in which they attach to the perforated mesh frames, using toggles to create a crafted feel. Comfort, versatility and functionality combine to make the Beach Lounge perfect for modern outdoor living. Beach cushions come with a 2 year warranty.

OLEFIN CUSHION FABRIC

The high specification Beach Lounge cushions are made using a tough 405gsm/m2 solution dyed olefin, with a colour fastness to light 8. The outside of the fabric has the pre-treated water proof finish applied, and on the rear side is the polyethylene (PE) layer that makes the fabric water resistant. Cushion covers are sewn using an unbreakable outdoor rot-proof marine grade thread, giving a lifelong strength to the seams.

VENTED MESH PANEL

In each of the seat and back cushions there is a sewn in vented mesh panel made from our durable Rose Sling material; this allows the air to escape when in use and returns the cushion back to its original shape after use. This design feature gives the Beach Lounge that luxurious sinking sensation and all round comfort.

HOLLOW FIBRE FILLING

The soft hollow fibre filling is fitted inside a breathable polypropylene (PP) interliner. This casing has excellent abrasion and antibacterial qualities. The internal 'pillow' is made up in compartments, which prevents the filling material from moving around and losing its shape over time.

CUSHION TOGGLE

The cushion toggles are made from hard-wearing colourfast ABS (Acrylonitrile Butadiene Styrene) and are fitted with an elasticated waterproof cord with a natural rubber core and a braided polyester outer sleeve. The toggle cord is joined together with zinc plated metal crimps. The toggles are easily fitted by the customer through the perforated holes in the frames.
