

ALEXANDER ROSE

WATERPROOF CUSHIONS

Maintenance & Information

Alexander Rose are manufacturers of 100% waterproof cushions. All cushions in our Beach Lounge, Fresco and Cordial collections are designed to be left outside 365 days a year. Our in-house cushion workshop can also produce made to measure cushions in a variety of fabrics.

HOW THEY ARE MADE

FABRIC

The high specification cushions are made using a tough 300gsm/m² polyester with a colour fastness to light ± 7 . The outside of the fabrics has the pre-treated water resistant finish applied and on the rear side is the polyethylene (PE) layer that makes the fabrics 100% waterproof.

The cushion fabric will dry in the sunshine within 1 hour, this may take longer in cloudy or damp conditions.

SEAMS

Cushion covers are sewn using a marine grade thread, giving strength to the seams. The seams are then sealed with a state of the art waterproof taping machine. This ensures that no water can get in through the seams.

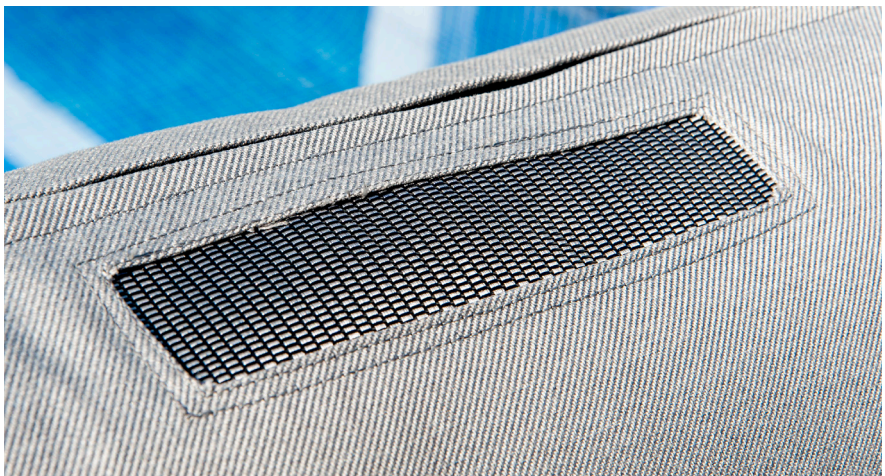

ZIP

The zip is protected by a downward flap. This allows water to run over the flap without coming into any contact with the zip. It is therefore essential that the cushions are placed the right way up, to prevent water collecting in the flap.

VENTED MESH PANEL

Our thicker cushions have a sewn in vented mesh panel made from our durable Rose Sling material; this allows the air to escape when in use and returns the cushion back to its original shape after use. This design feature gives a luxurious sinking sensation and all round comfort.

MAINTENANCE

CLEANING

The cushions can be cleaned with warm soapy water and a microfibre cloth. For stubborn stains on the cushions a diluted bleach solution (1 part bleach to 1 part water) is recommended. They are **not** machine washable.

If cushions are exposed to humid and damp conditions for more than 3 - 4 weeks at a time, we recommend that the cushion inners are removed from the covers and kept in a dry room to air thoroughly to prevent the build-up of any moisture inside the cushion.

PROTECTION

Beach Lounge waterproof cushions can be covered with our dirt proof cushion covers, to protect the cushions against airborne pollutants and to minimise the requirement for cleaning. Alternatively the cushions can be stored in one of our cushions bags.
