

H5215F5RL Leonesco Fountain

STAGE 1

Ensure you have all the correct items before you begin the assembly process.

STAGE 2

Stand the pedestal upright with the large bowl on top ensuring the large bowl is central to the pedestal.

STAGE 3

Feed the pump cable through the hole in the large bowl and feed all the way through until there is approx 10cm of cable between the pump and the bowl. Wrap the large rubber stopper around the cable and force into the hole creating a water tight seal.

STAGE 4

Stand the small pedestal inside the large bowl encasing the pump; attach one end of the black tubing over the pump's nozzle.

STAGE 5

Sit the tall pedestal on top of the small pedestal feeding the tubing through as you stand it up.

STAGE 6

Wrap the smaller rubber stopper around the tubing and force down into the hole creating a water tight seal.

H5215F5RL Leonesco Fountain

STAGE 7

Feed the end of the tubing through the top finial and stand on top of the tall pedestal.

STAGE 8

Insert the large trap door into the open space at the bottom of the fountain.

STAGE 9

The fountain is now ready for water, see your users guide for filling levels.

STAGE 10

If the fountain isn't level for some reason the water flows unevenly, use 'shims' to level up, simply slide under the side that needs propping up and snap off once the water level becomes even.

IMPORTANT - WINTER CARE

Winter Ice build-up can cause damage to concrete statuary. Follow these tips to reduce winter weathering to your fountain:

- Disconnect power to pumps.
- Remove adapter from bottom bowl to open drains and let all moisture out. Keep drains open throughout winter.
- Place an absorbant material like burlap, blankets etc inside vases/bowls and cover all with a fountain cover.
- Do not allow snow or ice to build up on or against the concrete. Remove snow before it turns to ice. Do not use salt or chemical ice removers as these may damage concrete.

ADVISORY NOTICE HEAVY ITEMS!

Please take care when handling these items
