

## 5215F5 Two Tier Leonesco

For details of the split bung and electrical installation, see page 18 of the Fact Book

### **Important Winter Care**

**Do not allow water to collect and freeze in fountain bowl(s) or shell. Do not allow fountain to sit in a pool of ice. Disassemble entire fountain and pump and store indoors during the winter season.**

If you cannot store your fountain indoors during the winter season, you must at least protect it from ice collection or exposure. "How" to protect your fountain during the winter: First remove the statue and pump, storing them inside if possible. Then locate the drain plug on the underside of the bowl or shell (if applicable) and empty the fountain of all water before placing some absorbent material such as burlap, blanket, etc into each bowl. Should condensation droplets form on the inside of the cover, they will be absorbed by the material. Finally cover the entire fountain with a Henri Fountain cover. By following these simple and sensible precautions during the winter season, you will protect your fountain for years of enjoyment.
