C - FIT YOUR PATIO COVER DIMENSIONS TO THE SITE

A Wall mounting height

The wall mounting profile (top back) can be adjusted from 260 to 305 cm (102.4" to 120") measuring from the ground to fit your space.

B Pole side positioning

The poles can be adjusted from 5 to 54 cm (2" to 21.3") from the side edges. Adjust poles after assembly and before anchoring.

C Pole to wall depth

Poles distance from the wall can be adjusted from 310 to 370 cm (122" to 145.6") as illustrated in the Diagram.

Decide what height and distance from the wall you would like to mount your patio cover.

This will determine the roof angle. Please note that while the product appearance may change slightly as a result of that angle, the snow load weight does not change.

EN INFORMATION

SAFETY ADVICE

- It is of utmost importance to assemble all of the parts according to the directions. Do not skip any steps.
- Always wear work gloves during panel sliding.
- Always wear shoes and safety goggles when working with extruded aluminium.
- If using a step ladder or power tools make sure that you follow the manufacturer's safety advice.
- Do not touch overhead power cables with the aluminium profiles.
- Do not climb or stand on the roof.
- Do not attempt to assemble the product in windy or wet conditions.
- Dispose of all plastic bags. Keep them out of reach of small children.
- Keep children away from the assembly area.
- Do not lean against or push the products during construction.
- Do not position your product in an area exposed to excessive winds.
- Do not attempt to assemble this product if you are tired, have taken drugs or alcohol or if you are prone to dizzy spells.
- Make sure there are no hidden pipes or cables in the ground before anchoring to foundation.
- This product is designed to be used mainly as a patio cover.
- Heavy snow load on the roof can make it unsafe to stand below or nearby.
- **The snow must be removed from the structure's roof if the accumulated snow height exceeds 40 cm (1'4").**
- **Make sure to anchor the product directly to a solid foundation to increase the product's stability and wind resistance, especially in areas with severe weather conditions.**

BEFORE ASSEMBLY

- Selecting a site:
 - Choose your site carefully before beginning assembly.
 - Choose a sunny position away from overhanging trees.
 - The product must be positioned and fixed on a flat level surface.
- The product must be secured directly to a solid foundation.
- This is a multi-part assembly best achieved by two people. Allow at least half a day for the assembly process.
- Take all components & parts out of the packages. Sort the parts and check against the content parts list.
- Parts should be laid out close at hand. Keep all small parts (screws etc.) in a bowl so they do not get lost.
- Please note multi-sided profiles are used in this product. As a result some holes in the profiles are not used during assembly.
- Please review entire instructions before starting. Carry out the assembly steps in exact order.
- Please consult your local authorities if any permits are required prior to constructing the product.
- Having purchased a long patio cover, make sure you received all boxes as shown on page 2 of the instruction manual (AVAILABLE MODELS).
- Use only the parts registered in the content list, some parts may be surplus.

IMPORTANT!

- Firmly connect the product to a level surface immediately after completion of the assembly.
- Anchoring this product to the ground is essential to its stability and rigidity. It is required to complete this stage in order for your warranty to be valid.
- During assembly use a soft surface below the parts to avoid scratches and damages.
- We recommend checking for restrictions or covenants for building this product in your area. In addition we advise to check if you need to submit any forms or if any permit is required prior to building the product.

DURING ASSEMBLY

During assembly, you will encounter different icons for different products. Please see below for more information:

You may use silicone lubricant spray on the frame in order to help you slide the panels into the profiles. Do not spray the panels.

Use a rubber mallet if necessary.

Make sure you remove covering plastic film from both sides of the panel.

All panels with the stamped words "THIS SIDE OUT" must be facing out to create full UV protection. Remove plastic sticker as panels are locked in place.

Steps marked with dashed outlines refer to Extensions only. Some of the steps are irrelevant for an assembly of a single product. When assembling a single or an extended product, some parts may be surplus.

These 2 icons below indicate if screw's tightening is required or not. Temporary tightening of a few screws may be needed to prevent a profile from sliding out. Tighten all screws once assembly is completed.

CARE & MAINTENANCE

- When your product needs to be cleaned, use a mild detergent solution and rinse with cold clean water.
- DO NOT use acetone, abrasive cleaners or other special detergents to clean the panels.
- Clean the product once assembly is complete.

IMPORTANT ASSEMBLY STEPS

When encountering this information icon during assembly, please refer the relevant assembly step for important additional comments.

Steps / pages marked with dashed outline are referring to the extension kit assembly, should be performed during the Patio Cover's assembly process. These steps are referring to the installation of the extension kit on the right side of the patio cover, installation on the left side is possible according to same steps.

- Step 4:** Insert 15 cm / 6" of inner part #7506 to profile #7507, set the screws as shown in Diagram a, and insert into profile #7040 / #7041.
- Steps 9, 10:** Please apply silicone sealants to the inner and outer edges of parts #7043 + #7042 + #7508, as well as to the middle of parts #8119 + #7039 in order to prevent water from seeping in.
- Step 11:** Apply silicone sealants on the inner part of #8116 & #8117 and connect to the profile.
- Step 12:** The wall-mounting profile can be adjusted from 260 to 305cm (102.4" to 120") above ground. The adjusting is done when measuring and drilling.
- Step 20:** Please apply silicone sealants above beam #7288 + #7290 + #7509 in order to prevent water from seeping in.
- Step 26:** Make sure that the angle between the back wall profile and the panel supporting profiles is 90 degrees. Assembly of the panels should start from the middle of the patio cover to each side alternately.
- Step 33:** Please adjust the poles (inside out and sideways) by sliding them to their final position prior to anchoring. Make sure that the poles distance from the Patio cover side edge does not exceed 54 cm / 21.3".
- Step 34:** Please make sure that distance from the poles and the kit connection to original patio cover not exceeds 60 cm / 23.6".
- Step 35:** Anchoring this product to the ground is essential to its stability and rigidity. It is required to complete this stage in order for your warranty to be valid.

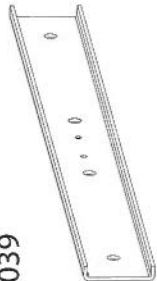

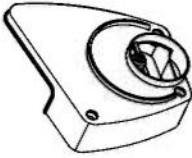

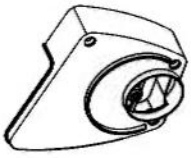

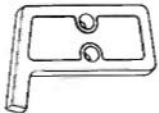

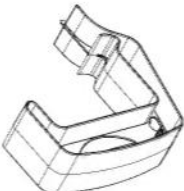

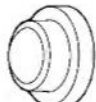

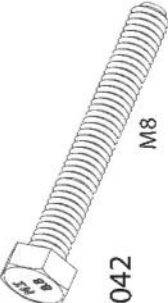

PRINCIPALES ÉTAPES D'ASSEMBLAGE

Lorsque vous rencontrez cette icône d'information pendant l'assemblage, veuillez vous référer à l'étape d'assemblage correspondante pour d'autres commentaires importants.

Étapes / pages marquées avec un contour en pointillés font référence à l'assemblage du Kit d'extension, doivent être réalisées lors du processus de montage de l'abri de terrasse. Ces étapes se réfèrent à l'installation du kit d'extension sur le côté droit du Toit de terrasse; installation du côté gauche est possible selon les mêmes étapes.

- Étape 4:** Insérez 15 cm / 6" de partie intérieure #7506 à la section #7507, fixez les vis comme indiqué sur le schéma a et insérez dans la section #7040 / #7041.
- Étapes 9, 10:** Appliquez du mastic en silicone sur les bords intérieurs et extérieurs des pièces #7043 + #7042 + #7508, ainsi qu'au milieu des pièces #8119 et #7039 afin d'empêcher l'eau de pénétrer.
- Étape 11:** Appliquez du mastic en silicone sur la partie intérieure de #8116 et #8117, et raccordez au cadre.
- Étape 12:** Le profilé de raccordement de paroi (supérieur-arrière) est ajustable de 260 à 305 cm (102,4 à 120 po.) au-dessus du sol. Cet ajustement s'effectue au moment de la prise de mesures et du perçage.
- Étape 20:** Appliquez un enduit en silicone sur les poutres #7288 + #7290 + #7509, afin d'empêcher l'eau de pénétrer.
- Étape 26:** Assurez-vous que l'angle entre la surface de la paroi arrière et les surfaces supportant les panneaux est de 90 degrés. L'assemblage des panneaux devrait commencer du milieu du toit de l'auvent puis de chaque côté en alternance.
- Étape 33:** Veuillez ajuster les poteaux (intérieur et latéralement) en les faisant glisser vers leur position finale avant de les fixer. Assurez-vous que la distance entre le côté de l'abri de la terrasse et les poteaux soit inférieure à "54 cm/21,3".
- Étape 34:** Assurez-vous que la distance depuis les poteaux et le kit de connexion au toit de l'auvent ne dépasse pas 60 cm / 23,6".
- Étape 35:** Cette étape d'ancrage du produit au sol est essentielle à sa stabilité et à sa rigidité, elle est de plus nécessaire pour assurer la validité de votre garantie.

Designation (Clause 8): Continuous rooflight with upstand, EN 14963:2006, ΔA, Cu 1, Ku 1, UL 1500, DL 1500, SB 300

Maximum allowed inclination: 5%

EN 14963:2006

Resistance to upward load: UL 1500

Resistance to downward loads: DL 1500

Reaction to fire: B, s1, d0

For mounting and fixing provisions see EN 16153:2013

For a unique manufacturer's document see Polygal's DoP reference 10626009

Resistance to fire: NPD

External fire performance: F_{ROOF}

Water tightness:

For the rooflight with upstand: Pass

For the sheet material: Pass

Impact resistance:

For the small hard body: Pass

For the large soft body: Pass

Thermal transmittance:

For the rooflight: NPD (not relevant to an open multi purpose cover)

For the sheet material: 2.45 W/(m²·K)

Direct airborne sound insulation: NPD (not relevant to an open multi purpose cover)

Radiation transmittance:

- Light transmittance: Tv - 52.0 %

- Solar direct transmittance: Te - 62.5 %

- Solar factor: g value - 0.72

Air permeability:

For the rooflight: NPD (not relevant to an open multi purpose cover)

For the sheet material: Pass

Durability (of the sheet material): ΔA, Cu 1, Ku 1

Declaration of Performance

According to Construction Products Council Directive UE N°305/2011 and EN 14963:2006
Issue Date 27/10/2016

1. Identification code: Arcadia™ 5000
2. Type: A light transmitting self-supporting twin-wall PC roofing structure with upstand made of aluminum and galvanized steel elements
3. Intended use: multi-purpose covering where the ground slope is less than 5%
4. Manufacturer:
Palram Applications (1995) Ltd. Teradion Industrial Park, M.P Misgav 2017400, P.O.B. 53, Israel
5. Assessment and verification of constancy of performance: System 3
6. Declared performance:

Resistance to upward load: UL 1000

Resistance to downward loads: DL 2500

Reaction to fire: B, s1, d0

For mounting and fixing provisions see EN 16153:2013

Resistance to fire: NPD

External fire performance: F_{ROOF}

Water tightness:

For the rooflight with upstand: Pass

For the sheet material: Pass

Impact resistance:

For the small hard body: Pass

For the large soft body: NPD

Thermal transmittance:

For the rooflight: NPD (not relevant to an open parking lot)

For the sheet material: 3.6 W/(m²·K)

Direct airborne sound insulation: NPD (not relevant to an open parking lot)

Radiation transmittance:

- Light transmittance: Tv - 82%

- Solar direct transmittance: Te - 72.7%

- Solar factor: g value - 0.75

Air permeability:

For the rooflight: NPD (not relevant to an open parking lot)

For the sheet material: Pass

Durability (of the sheet material): ΔA, Cu 1, Ku 1

7. The performance of the product identified in points 1 and 2 is in conformity with the declared performance in point 6.

This declaration of performance is issued, in accordance with Annex ZA.2.2 – EN 14963:2006, under the sole responsibility of Palram Applications (1995) Ltd.
