EN INFORMATION

SAFETY ADVICE

- It is of utmost importance to assemble all of the parts according to the directions. Do not skip any steps.
- Always wear work gloves during panel sliding.
- Always wear shoes and safety goggles when working with extruded aluminium.
- If using a step ladder or power tools make sure that you follow the manufacturer's safety advice.
- Do not touch overhead power cables with the aluminium profiles.
- Do not attempt to assemble the product in windy or wet conditions.
- Do not climb or stand on the roof.
- Dispose of all plastic bags. Keep them out of reach of small children.
- Keep children away from the assembly area.
- Do not lean against or push the products during construction.
- Do not position your product in an area exposed to excessive winds.
- Do not attempt to assemble this product if you are tired, have taken drugs or alcohol or if you are prone to dizzy spells.
- Hot items such as recently used grills, blowtorches etc. must not be stored in the product.
- Make sure there are no hidden pipes or cables in the ground before anchoring to foundation.
- This product is designed to be used mainly as a garden gazebo.
- **Make sure to anchor the product directly to a solid foundation to increase the product's stability and wind resistance in areas with severe weather conditions. Make sure that there are no obstructions between the assembly area and the final position of the product.**

CARE & MAINTENANCE

- When your product needs to be cleaned, use a soft cloth and rinse with cold clean water.
- DO NOT use acetone, abrasive cleaners or other special detergents to clean the panels.
- Clean the product once assembly is complete.

BEFORE ASSEMBLY

- Selecting a site:
 - Choose your site carefully before beginning assembly
 - Choose a sunny position away from overhanging trees.
 - The product must be positioned and fixed on a flat level surface.
 - The product must be secured directly to a solid foundation.
- This is a multi-part assembly best achieved by two people. Allow at least half a day for the assembly process.
- Take all components & parts out of the packages. Sort the parts and check against the content parts list.
- Parts should be laid out close at hand. Keep all small parts (screws etc.) in a bowl so they do not get lost.
- Please note multi-sided profiles are used in this product. As a result some holes in the profiles are not used during assembly
- Please review entire instructions before starting. Carry out the assembly steps in exact order.
- Please consult your local authorities if any permits are required prior to constructing the product.
- Please ensure you have sufficient side space for inserting the roof panels during the assembly process.

IMPORTANT!

- Firmly connect the product to a level surface immediately after completion of the assembly.
 - Anchoring this product to the ground is essential to its stability and rigidity. It is required to complete this stage in order for your warranty to be valid.
 - During assembly use a soft surface below the parts to avoid scratches and damages.
 - We recommend checking for restrictions or covenants for building this product in your area.
- In addition we advise to check if you need to submit any forms or if any permit is required prior to building the product.

DURING ASSEMBLY

During assembly, you will encounter different icons for different products. Please see below for more information:

You may use silicone lubricant spray on the frame in order to help you slide the panels into the profiles. Do not spray the panels.

Use a rubber mallet if necessary.

Make sure you remove covering plastic film from both sides of the panel.

All panels with the stamped words "THIS SIDE OUT" must be facing out to create full UV protection. Remove plastic sticker as panels are locked in place.

This icon indicates that the installer should be inside the product.

This icon indicates that the installer should be outside the product.

Steps marked with dashed outlines refer to Extensions only. Some of the steps are irrelevant for an assembly of a single product. When assembling a single or an extended product, some parts may be surplus.

These 2 icons below indicate if screw's tightening is required or not.

Temporary tightening of a few screws may be needed to prevent a profile from sliding out. Tighten all screws once assembly is completed.

IMPORTANT ASSEMBLY STEPS

When encountering this information icon during assembly, please refer the relevant assembly step for important additional comments.

Step 1:

The ground surface must be perfectly flat and leveled and have a solid base such as concrete, deck etc. At this stage a circle should be marked for the hexagon corners to be placed later.

Step 7:

Attach the hexagon's corners to the marked circle, make sure they are flat and level prior to connecting to the base. Make sure you use the suitable screws and plugs for your type of base.

Steps 18+19:

If you find it slightly difficult to slide the roof panels in, it will be easily done by 2 people. One on a step ladder near the peak and the other pushing from the bottom.

Please note you install the panels with the UV protected side out (marked with "THIS SIDE OUT") remove plastic film before inserting panels and locking in place.

If the panels received with the product are Bronze, please remove only the plastic sticker as panels are locked in place.

Step 20:

Please decide upon the entrance direction. The next assembly steps will show doors with the locking done from outside (later on, we will show the assembly of the other doors which are to be locked from inside).

*** Please note, the direction and placement of the doors in the following steps**

Steps 26+27:

Please assemble the rest of the doors, pay close attention to the direction.

The locking of the doors should be done from inside.

PRINCIPALES ÉTAPES D'ASSEMBLAGE

Lorsque vous rencontrez cette icône d'information pendant l'assemblage, veuillez vous référer à l'étape d'assemblage correspondante pour d'autres commentaires importants.

Étape 1:

La surface du sol doit être parfaitement plane et nivelée et avoir une base solide telle que le béton, le tablier, etc. À ce stade, un cercle doit être marqué pour que les angles hexagonaux soient placés plus tard.

Étape 7:

Fixez les coins de l'hexagone au cercle indiqué, assurez-vous qu'ils sont à plat et au niveau avant de les connecter à la base. Assurez-vous d'utiliser les vis et chevilles adaptées à votre type de base.

Étapes 18+19:

Si vous trouvez qu'il est un peu difficile de faire glisser les panneaux de toit dedans, cela sera facile à faire par 2 personnes. Une sur un escabeau près de la crête et l'autre en poussant à partir du bas.

Veuillez noter que vous installez les panneaux avec le côté protégé contre les UV (marqué par "THIS SIDE OUT"), enlevez le film plastique avant d'insérer les panneaux et les verrous en place.

Si les panneaux reçus avec le produit sont clairs / blancs, veuillez ne retirer que l'autocollant en plastique car les panneaux sont verrouillés.

Étape 20:

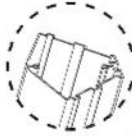

Veuillez choisir le sens de l'entrée. Les prochaines étapes de montage montreront les portes avec le verrouillage fait de l'extérieur (par la suite, nous allons montrer l'assemblage des autres portes qui doivent être verrouillées de l'intérieur)

*** Veuillez noter, le sens et l'emplacement des portes dans les étapes suivantes**

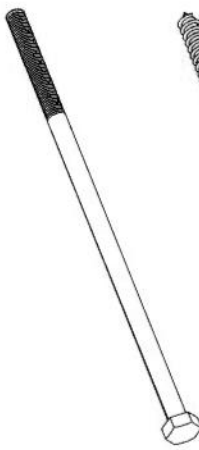

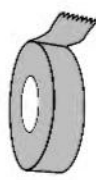

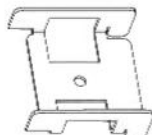

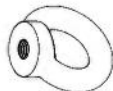

Étapes 26+27:

Veuillez assembler le reste des portes, accorder une attention particulière au sens.

Le verrouillage des portes doit se faire de l'intérieur.
