## EN INFORMATION

### SAFETY ADVICE

- It is of utmost importance to assemble all of the parts according to the directions. Do not skip any steps.
  - Always wear work gloves during panel sliding.
  - Always wear shoes and safety goggles when working with extruded aluminium.
  - If using a step ladder or power tools make sure that you follow the manufacturer's safety advice.
  - Do not touch overhead power cables with the aluminium profiles.
  - Do not attempt to assemble the product in windy or wet conditions.
  - Do not climb or stand on the roof.
  - Dispose of all plastic bags. Keep them out of reach of small children.
  - Keep children away from the assembly area.
  - Do not lean against or push the products during construction.
  - Do not position your product in an area exposed to excessive winds.
  - Do not attempt to assemble this product if you are tired, have taken drugs or alcohol or if you are prone to dizzy spells.
  - Hot items such as recently used grills, blowtorches etc. must not be stored in the product.
  - Make sure there are no hidden pipes or cables in the ground before anchoring to foundation.
  - This product is designed to be used mainly as a greenhouse.
  - Make sure to anchor the product directly to a solid foundation to increase the product's stability and wind resistance in areas with severe weather conditions. Make sure that there are no obstructions between the assembly area and the final position of the product.**
- The Paltram - Canopia Anchoring kit is available for purchase separately.

### CARE & MAINTENANCE

- When your product needs to be cleaned, use a mild detergent solution and rinse with cold clean water.
- DO NOT use acetone, abrasive cleaners or other special detergents to clean the panels.
- Clean the product once assembly is complete.

### BEFORE ASSEMBLY

- Selecting a site:
  - Choose your site carefully before beginning assembly.
  - Choose a sunny position away from overhanging trees.
  - The product must be positioned and fixed on a flat level surface.
- The product must be secured directly to a solid foundation.
- This is a multi-part assembly best achieved by two people. Allow at least half a day for the assembly process.
- Take all components & parts out of the packages. Sort the parts and check against the content parts list.
- Parts should be laid out close at hand. Keep all small parts (screws etc.) in a bowl so they do not get lost.
- Please note multi-sided profiles are used in this product. As a result some holes in the profiles are not used during assembly.
- Please review entire instructions before starting. Carry out the assembly steps in exact order.
- Please consult your local authorities if any permits are required prior to constructing the product.
- Please ensure you have sufficient side space for inserting the roof panels during the assembly process.

### IMPORTANT!

- Firmly connect the product to a level surface immediately after completion of the assembly.
  - Anchoring this product to the ground is essential to its stability and rigidity. It is required to complete this stage in order for your warranty to be valid.
  - During assembly use a soft surface below the parts to avoid scratches and damages.
  - We recommend checking for restrictions or covenants for building this product in your area.
- In addition we advise to check if you need to submit any forms or if any permit is required prior to building the product.

### DURING ASSEMBLY

During assembly, you will encounter different icons for different products. Please see below for more information:

You may use silicone lubricant spray on the frame in order to help you slide the panels into the profiles. Do not spray the panels.

Use a rubber mallet if necessary.

Make sure you remove covering plastic film from both sides of the panel.

All panels with the stamped words "THIS SIDE OUT" must be facing out to create full UV protection. Remove plastic sticker as panels are locked in place.

This icon indicates that the installer should be inside the product.

This icon indicates that the installer should be outside the product.

Steps marked with dashed outlines refer to Extensions only. Some of the steps are irrelevant for an assembly of a single product. When assembling a single or an extended product, some parts may be surplus.

These 2 icons below indicate if screw's tightening is required or not.

Temporary tightening of a few screws may be needed to prevent a profile from sliding out. Tighten all screws once assembly is completed.

## IMPORTANT ASSEMBLY STEPS

When encountering this information icon during assembly, please refer the relevant assembly step for important additional comments.

### Step 4:

Refers only for the extension kit! The extension kit contains a base connector, either part **#8447** or **#7601**.

### Step 11:

Please make sure the screw connection is made exactly as illustrated.

A - Connect the screw in the left hole.

B - Connect the screw in the right hole.

### Step 13:

Peel the film covering the panel. Make sure you install it with the UV protected side out.

### Step 23:

**Side Louver Window:** can be located only on one of the two central panels.

\* If you assemble the greenhouse with an extension module, the window can be placed on all panels, except for the last two end panels.

\* **Note:** The selected placing will affect the next assembly steps.

### Step 32:

It is highly recommended to paste the sealing tape at the bottom edge of panels **7903 + 7904** in order to prevent moisture seepage.

### Step 39:

Roof window can be located only on one of the two central roof panels.

\* If you assemble the greenhouse with an extension module, the roof windows must be placed on panels only as specified in the manual.

\* **Note:** The selected placing will affect the next assembly steps.

### Step 44:

Please tighten screws from inside the greenhouse. In addition, please tighten the remaining loose screws.

### Step 49:

As mentioned at the '**Before Assembly**' section, prior to fitting the **Automatic Vent Opener**, the power-tube has to be cooled by placing it in a refrigerator for approximately 30 minutes.

### Step 58:

Door can be installed as a left hand door or right hand door as per your decision. These instructions show a right hand door assembly. Please determine door opening direction. This decision will affect the next assembly steps.

### Step 60:

Please adjust the hinges height in accordance with the upper post and lower ramp of the door aperture, as specified in **Level C**.

### Step 61:

If necessary, you can rotate the cylinder tab. See Figures a + b.

### Step 65:

Threading parts **7888** exactly as specified in **Level B**, is very important in order to create good drainage.

### Steps

### 69+70:

Anchor the greenhouse on to a solid surface such as concrete or asphalt, use suitable screws and plugs.
