PLEASE KEEP THESE INSTRUCTIONS

Every Zest product is unique because each piece of timber has its own distinctive, natural features.

Zest sources all of its timber from responsibly-managed forests and everything it designs and produces meets the highest standards of sustainability. Zest ensures that all timber and timber-related products are certified to Forestry Stewardship Council (FSC®).

This is vital not only for the health of the planet, but also shows Zest's commitment to the environment and to responsible sourcing. Timber is a natural material and, as such, will fit beautifully within any outdoor space. This also means that all Zest pieces are unique because every piece of timber has its own distinctive features.

Natural and Unique...

Changes in temperature and humidity will cause expansion and contraction so Zest products need time to adjust to where the owners live. A few splits or cracks are part of the maturing process and will not affect strength or durability. Knots embedded in the wood are natural and tell the story of the tree which made them. Customers may notice variations in colour but, once out in the garden and exposed to the sun, colour and shading will even out.

Fresh pressure treatment sometimes leads to a small amount of green-spotting on the surface of new timber as the natural salt leaves the wood. This will fade away over time and is in no way detrimental to quality or durability.

Splits and cracks occur naturally in the timber grain due to changing temperatures and humidity levels. They are not usually a cause for concern as they don't affect the strength or durability of the product. If however, a 2p coin can fit into the split or crack there may be an issue so it should be reported to the retailer in writing with photographic evidence.

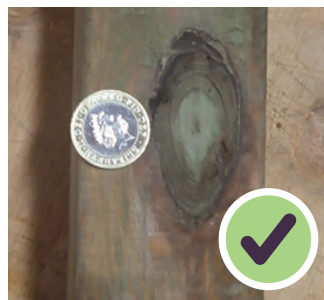

Most Zest products are pressure treated which protects the timber from rot and means customers will be able to enjoy the products in their garden for many years.

The benefits of slow grown timber

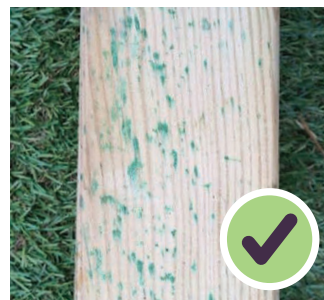

“ Slow grown timber from Eastern Europe is ideal for timber garden furniture. It produces a stronger grain in the wood giving it more durability and is said to be as strong as some hard woods. ”

Normal splits are characteristics of timber.

Knots are characteristics of timber.

Sun Bleaching & Green Spotting are not causes for concern and they will fade over time when items are placed outdoors.

Should you find a large split or dead knot, please email a photo to your retailer for investigation.

Katie Round Picnic Table Assembly Instructions

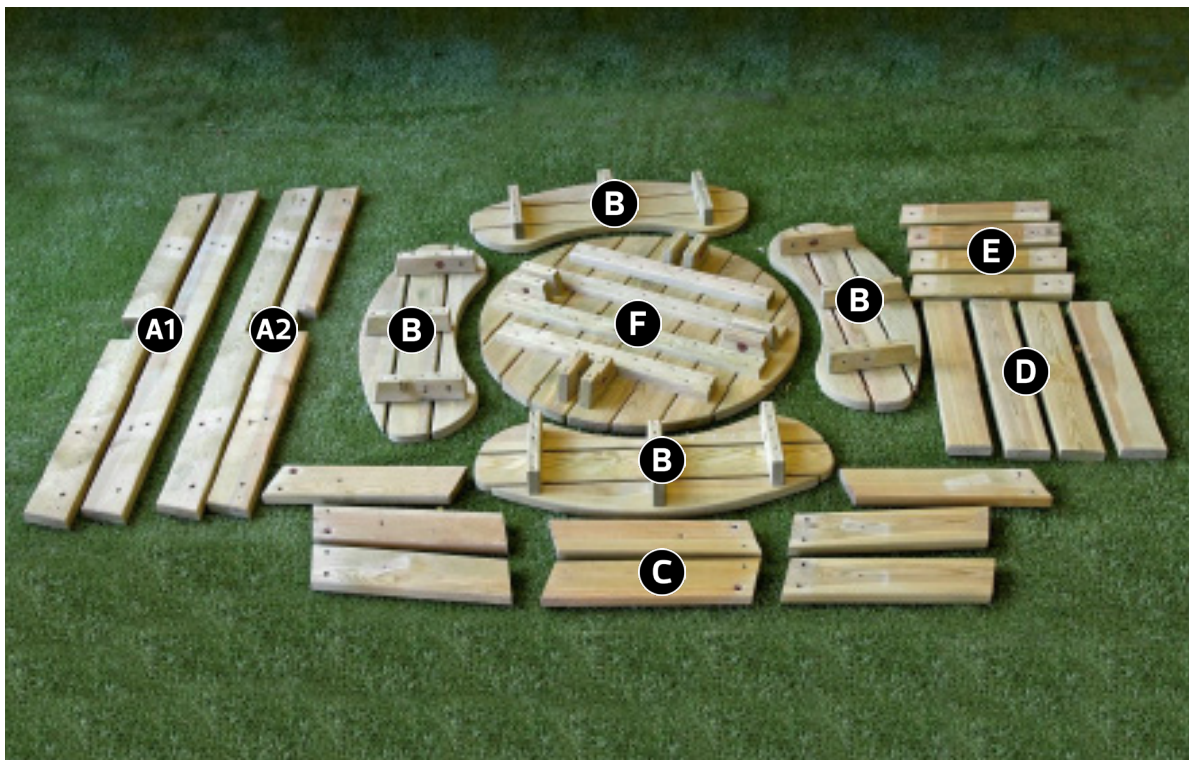

Requires 2 Person assembly

Tools required: Hammer / Mallet, Corded / Cordless Drill, 13mm Socket & Ratchet, Adjustable Spanner.

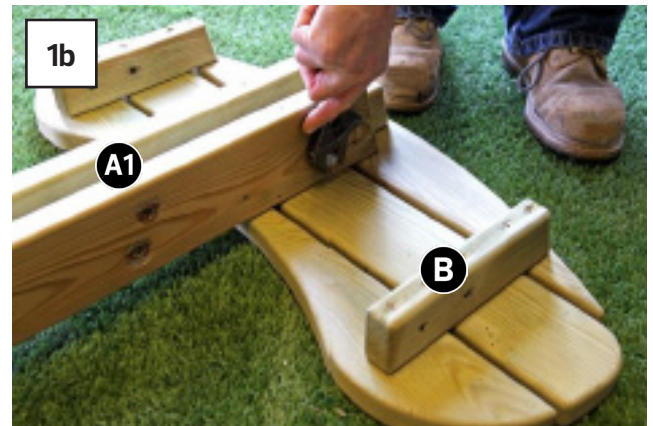

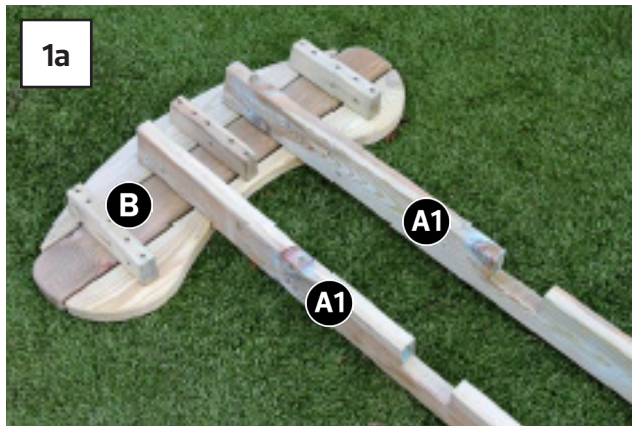

Please take a few moments to check all pack contents listed

Katie Round Picnic Table Pack List			
Code	Item	Description	Quantity
09106	A1	Seat Bar (Upper)	2
09107	A2	Seat Bar (Lower)	2
09108	B	Seat Assembly	4
09109	C	Leg	8
09110	D	Leg Brace	4
09111	E	Table Top Support	4
09112	F	Table Top	1

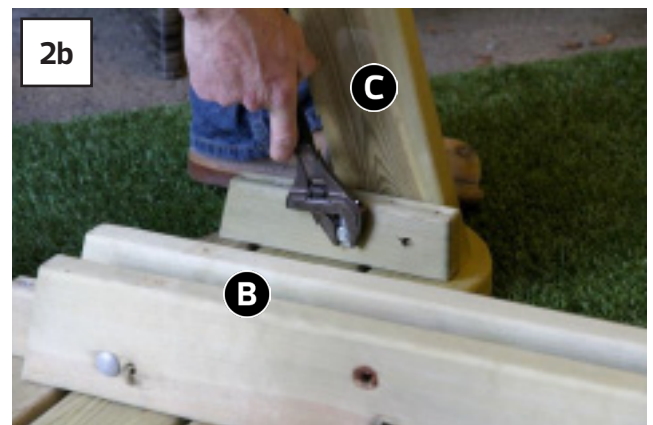

09622 - Katie Round Picnic Table Fixings List		
Item	Description	Quantity
1	80mm Screws	8
2	120mm Screws	8
3	70mm Bolts (Nuts & Washers)	16
4	100mm Bolts (Nuts & Washers)	16

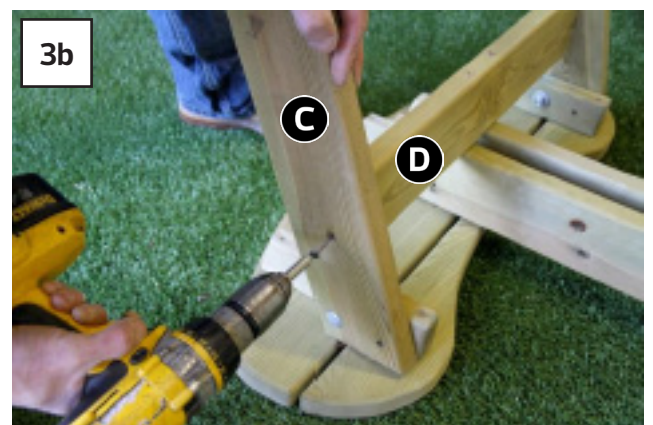

This product is made from pressure-treated timber. It should not be painted or coated with any other treatment until at least 6 months after purchase

1

Position Seat Bars (A1) onto 2 no Seat Assemblies (B) (Fig 1a), align bolt holes and insert 1no 100mm bolt per seat. Attach nuts and washers (Fig 1b). Do not fully tighten at this stage. Repeat process using Seat Bars (A2) and remaining Seat Assemblies (B) as shown in Fig 1c.

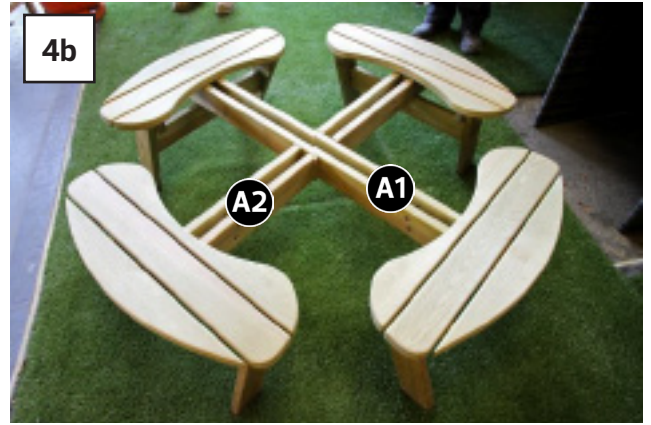

2

Position Leg (C) to the outer face of support timbers on the seat assembly as shown in Fig 2, align bolt holes and insert 2no 70mm bolts per leg. Attach nuts and washers. Do not fully tighten at this stage. Repeat process for the remaining 7 Legs.

3

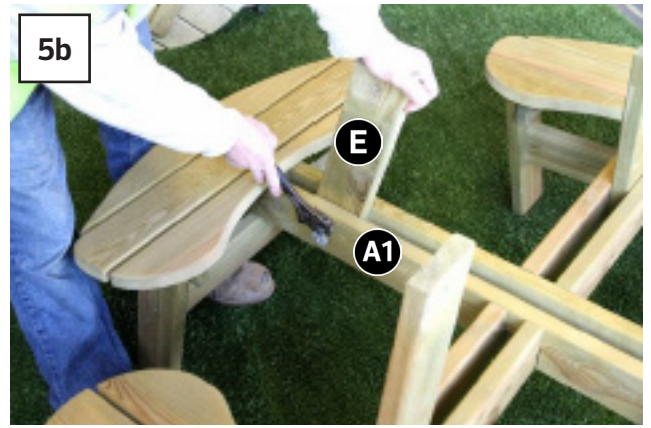

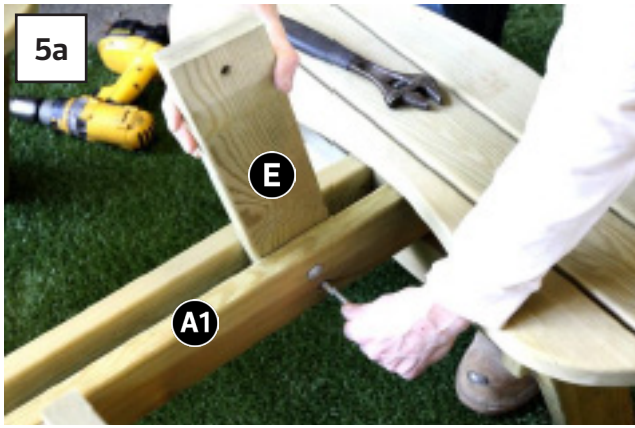

Using 2no 120mm screws attach Leg Brace (D) to Seat Bars as shown in Fig 3a. Secure Legs to Leg Brace using 2no 80mm screws as shown in Fig 3b. Repeat for remaining Leg Braces.

4

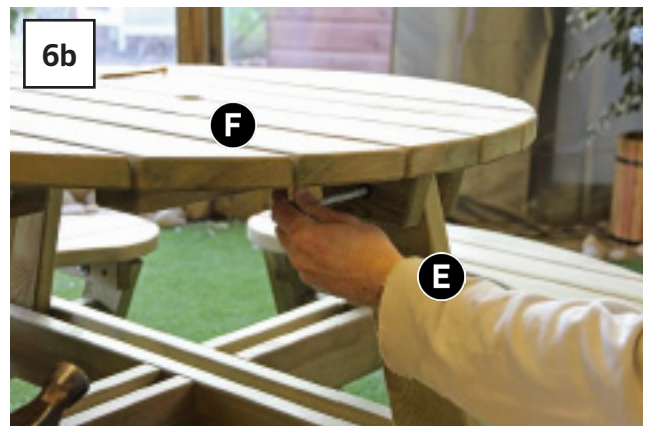

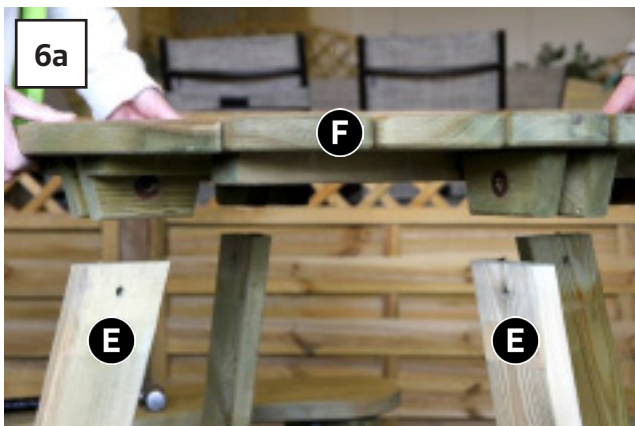

Turn assemblies over and interlock Seat Bars (A1) and (A2), as shown in Fig 4a & 4b.

5

Insert Table-Top Support (E), align bolt holes and insert 2no 100mm bolts (Fig 5a). Attach nuts and washers. Do not fully tighten at this stage. Repeat for remaining 3no Table-Top Supports (Fig 5b).

6

Locate Table-Top (F) on to Table-Top Supports and align bolt holes. Insert 4no 100mm bolts and attach nuts and washers.

Your Katie Round Picnic Table is now complete.
