DURING ASSEMBLY

You may use silicone lubricant spray on the frame in order to help you slide the panels into the profiles. Do not spray the panels.

Use a rubber mallet if necessary.

Make sure you remove covering plastic film from both sides of the panel.

All panels with the stamped words "THIS SIDE OUT" must be facing out to create full UV protection. Remove plastic sticker as panels are locked in place.

This icon indicates that the installer should be inside the product.

This icon indicates that the installer should be outside the product.

Steps marked with dashed outlines refer to Extensions only. Some of the steps are irrelevant for an assembly of a single product. When assembling a single or an extended product, some parts may be surplus.

These 2 icons below indicate if screw's tightening is required or not.

Temporary tightening of a few screws may be needed to prevent a profile from sliding out.

Tighten all screws once assembly is completed.

IMPORTANT ASSEMBLY STEPS

When encountering this information icon during assembly, please refer the relevant assembly step for important additional comments.

This block contains the parts list for step 5. It lists two long aluminum profiles, part number 8891, and two screws, part number 7524. The screws are shown with their heads and threads.

The main assembly diagram shows the table frame with a diagonal support leg. A circular callout labeled 'a' shows a close-up of the aluminum profile 8891 being attached to the leg. The profile is shown with its T-shaped cross-section and how it fits into the leg's channel.

Inset diagram 'a' provides a detailed view of the assembly. It shows the aluminum profile 8891 being secured to the leg with a screw 7524. A screwdriver is shown driving the screw into the pre-drilled hole in the profile. A warning icon shows a hand holding the profile incorrectly, with a large 'X' over it, indicating that the profile should not be held by hand during the screwing process.
