### DURING ASSEMBLY

**During assembly, you will encounter different icons for different products. Please see below for more information:**

You may use silicone lubricant spray on the frame in order to help you slide the panels into the profiles. Do not spray the panels.

Use a rubber mallet if necessary.

All panels with the stamped words "THIS SIDE OUT" must be facing out to create full UV protection. Remove plastic sticker as panels are locked in place.

Steps marked with dashed outlines refer to Extensions only. Some of the steps are irrelevant for an assembly of a single product. When assembling a single or an extended product, some parts may be surplus.

These 2 icons below indicate if screw's tightening is required or not.

Temporary tightening of a few screws may be needed to prevent a profile from sliding out. Tighten all screws once assembly is completed.

## IMPORTANT ASSEMBLY STEPS

When encountering this information icon during assembly, please refer the relevant assembly step for important additional comments.

- Step 1:** If you've purchased the **Alpine**, you should refer to their instructions at this point.
- Step 5+9:** Use silicone sealant on both sides of part # 8969.
