## *Stone Lanterns....*

*The origin of stone lanterns stretches back over 1000 years. They served to light temples and the grounds of shrines.*

*Japanese Tea Houses adopted them to light the dark paths that lead to the Tea Ceremony Houses. In modern times they are used as garden decorations. They are not placed to brightly illuminate an area but rather to cast a warm glow that brings a feeling of peace and serenity.*

*These lanterns are for use with tealights or candles (not included).*

*Most large lanterns are broken down in to more manageable parts for assembly by the customer in situ.*
