

Ida Wall Gardens

Ida 3300 with horticultural glass

Optional steel base

Ida 1300 with horticultural glass

Optional shelving for Ida 900 & 1300

The Ida Wall Gardens are perfect for gardeners who have limited space available. Designed for use on balconies, patios or walled gardens, these models are ideal for plants, seedlings and tomatoes. Each of the three models has one roof vent and a high ridge to ensure easy access. The Ida 900 and 1300 both have a single smooth action sliding door, whereas the Ida 3300 has front mounted double doors for increased access. Prefabricated steel bases are available as an optional extra, as is a shelf set for the Ida 900 and 1300 which, comprising two shelves, substantially increases the growing area.

Like all VITAVIA greenhouses, the Ida Wall Gardens are constructed from anodised aluminium, ensuring clean handling and a pristine finish. Frames are available in natural silver colour or powder-coated green and come with fully illustrated Assembly Instructions.

Specifications

Model	Nominal Size	Length	Width	Eaves Height	Ridge Height	Vents	Growing Area
Ida 900	2' x 4'	0.69m (2'3")	1.32m (4'4")	1.52m (5'0")	1.84m (6'0")		0.9m ² (10ft ²)
Ida 1300	2' x 6'	0.69m (2'3")	1.94m (6'4")	1.52m (5'0")	1.84m (6'0")		1.3m ² (14ft ²)
Ida 3300	4' x 8'	1.30m (4'3")	2.57m (8'5")	1.65m (5'5")	2.22m (7'3")		3.3m ² (36ft ²)

Greenhouse base (optional accessory)

It is essential that every greenhouse is built on a firm and level base. Vitavia prefabricated steel bases are available as an accessory for all Vitavia models. Matching coloured bases are available for painted greenhouses. Using a Vitavia base will add an extra 12.5cm (5") to the height of the greenhouse.

Greenhouse Accessories*

A wide range of useful and labour saving accessories are included in the Vitavia Range. Shelving and staging help make the most of the space within a greenhouse. Folding units are available, if you want to grow taller plants. Extra roof vents and louvre side windows are also available together with automatic openers that allow vents and louvre windows to open and close according to temperature and down pipes can be fitted for the collection of rainwater.

Controlling the greenhouse temperature

Vitavia offers a range of equipment for measuring the temperature and humidity of the air to enable the gardener to obtain optimum conditions for growing plants. (Cucumbers require a soil temperature of 18°C in order to absorb water and nutrients; for tomatoes it's 16°C)

**For full details of all the products in the Accessory Range, see the separate Vitavia information leaflet.*

Glazing options**

Vitavia greenhouses are available with three glazing options :-

Horticultural Glass : the traditional glazing option

Toughened, Safety Glass : no sharp edges; ideal when young children are around

Twin - wall Polycarbonate : retains heat, diffuses sunlight and reduces the risk of scorch. Safe and virtually unbreakable.
