Thank you for choosing this garden structure from Grange. In order to gain the most benefit from it please read the following instructions carefully.

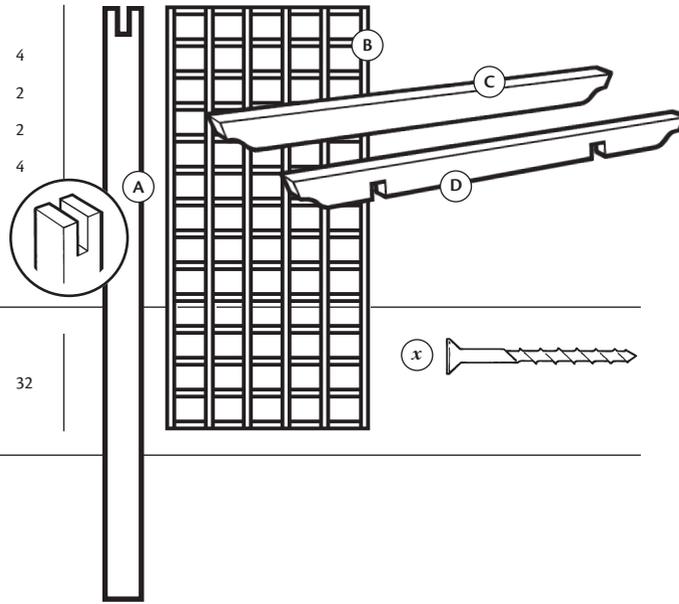

TOOLS REQUIRED (Not Supplied)

- POWER SCREWDRIVER
- TAPE MEASURE
- STEPLADDER
- SPIRIT LEVEL

PARTS LIST

- (A) POSTS 4
- (B) SQUARE TRELLIS 2
- (C) RAFTERS 2
- (D) RAFTERS 4

HARDWARE PACK

- (x) SCREW 5 x 80 32

BEFORE YOU START

- Please ensure that you check all the component parts for quantity and quality before you commence building the product. Report any missing parts immediately. The manufacturer will not accept any responsibility for damaged items once any part of the product has been fitted or altered in any way.
- Timber is a natural material and will react to varying levels of moisture content - ie. will swell or shrink. All of the Timber components are pressure treated green. However, should extra protection be required, they should be treated using a wood preservative treatment, following the manufacturers instructions.

HEALTH AND SAFETY

Do **NOT** overstretch when working from the step ladder.

In order to reduce the risk of suffocation please keep all plastic bags and small parts away from children.

- When you are ready to start, make sure you have the right tools to hand, plenty of space and a clean, dry area for assembly.
It is advisable for two people erect the structure.

PREPARATION

Make sure the area where the Portico is to be positioned is clear and ready for building the structure.

ASSEMBLY INSTRUCTIONS

SITE PREPARATION

Mark out the area where the structure is to be sited using the footprint shown right.

Excavate a hole for each post to a depth of 30cm (see *fig.1*) This will give your structure adequate stability.

ASSEMBLY

STEP 1

Take two of the Posts (A) and one piece of the Trellis (B) and fix the trellis to each of the posts using screws (x) as shown in *Fig.2*.

STEP 2

Repeat for the other two posts and trellis.

STEP 3

Determine the width required between the two assemblies and place one of the rafters (C) into the top of one of the posts. Set the distance between the post and the end of the rafter and fix in place using screws (x) as shown in *Fig.3*.

STEP 4

Fix the other Rafter (C) into the post in the same assembly in the same way - see *Fig.3*.

STEP 5

Lift the two rafters and locate into the top of the other post and trellis assembly. Set the rafters at the same distance from the end and screw in place using screws (x).

STEP 6

Space the four Rafters (D) across the assembly equally and fix in place using screws (x).
