| TOP \& LOWER TIER TRAYS | Right-hand intermediate leg 尼 |  | - |  | 1 | 1 | 1 | 2 | 2 | 2 | 3 | 3 | 3 | 4 | 4 | 4 | 5 | 5 | 5 |
|  | Bracings | 88 |  | 88 | 14141 |  |  | 202020 |  | 20262626 |  |  |  | $32 \quad 32 \quad 32$ |  |  | $38 \quad 38 \quad 38$ |  |  |
| NOTE: The screw head bolts can be used in either direction. Having the nuts on the outside is the quicker option and gives the trays more space when inserted. However, having the nuts on the inside gives a neater finish and the trays have a snug fit. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

SETUP. Separate your components into separate piles ready for assembly.

INTERMEDIATE FRAME

Join the end upright sections at the top using side rails ' $E$ '.

Add a bracing on each corner to add strength.

- Add intermediate sections and attach to rails using bracings.

For 2 or $\mathbf{3}$ tier units fix remaining rails 'D' onto the lower tier beams 'B'.

- Square up staging and tighten all nuts and bolts.

If you have any problems please do not hesitate to call us on
